DSS StaffManager

Capacity planning and time-tracking software

The Challenge

Many companies keep track of employees' working time on paper or in Excel files, making the collection of information cumbersome, time-consuming, and error-prone. In several cases, although workers have unused capacity, it is difficult to re-design working schedules due to the complexity of the task or the lack of follow-up on qualifications.
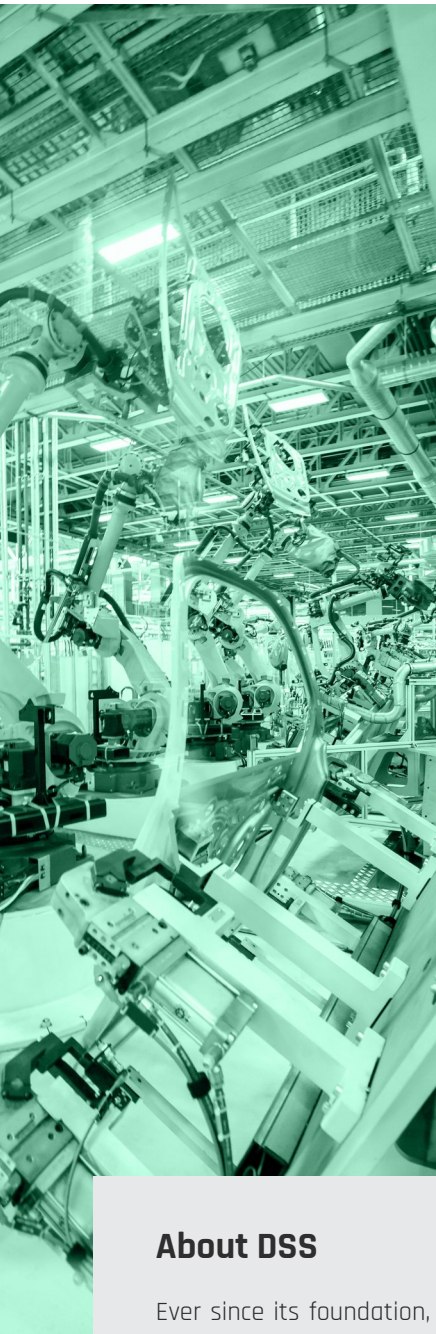

The Solution

With DSS StaffManager, planned and actual working time can be recorded and measured at both the employee and project level—in both office and industrial environments. Based on this data, capacity allocation can be planned more accurately, so resources can even be allocated for future projects as well.

- A unified staff management solution: A flexible, competency-based system that delivers working time savings

- Transparency: Better quality information improves capacity planning, enables more effective decision-making and cost allocation, and ensures traceability

Key Features

- Time, project and competency management in a single application
  - Time management: Managing working time, overtime, absences, vacations and bank holidays—enabling the creation of individual work plans
  - Project management: Project-based workforce capacity planning
  - Competency management: Competency-based resource planning—this way, StaffManager ensures that employees with up-to-date qualifications and knowledge perform the given task
- Functions tailored to the manufacturing sector
  - Managing shifts: Shift supervisors can easily plan shift schedules, with the possibility to allocate resources even to future projects
  - Possibility to record machine operating time (optional, with system integrations)
  - Multi-level architecture: Factory, manufacturing unit, production line, workstation
- Active/passive integration with existing ERP systems
- Easy-to-use, clear user interface
- Customizable Dashboard (optional)
- GDPR compliant solution: Everyone sees only their own details, so the possibility of unauthorized access to personal data is eliminated

About DSS

Ever since its foundation, DSS Consulting Zrt. has specialized in custom developments, business intelligence systems and analytical solutions. We are proud that our company has pioneered business analytics solutions, data quality assurance and data mining in Hungary. Based on this knowledge and experience, we have expanded our portfolio with industrial digitalization solutions, thanks to which we have been able to effectively help the digitalization efforts of our customers not only in finance, insurance, and telecommunications, but also in the industrial sector for several years. Thanks to our experience of more than 20 years, as independent consultants, we have been focusing on choosing the best solution to each challenge that our customers deal with.
