

# DSS WorkflowHero

Workflow management solution for manufacturing companies

## The Challenge

Many companies still manage tasks, schedules, and workflows in Excel—this makes them hard to track, requiring a lot of energy from managers, and creating reports is also difficult.

Also, existing ERP systems often have a workflow module, but it is usually complex and has many redundant functions, so it is not used in practice.

## The Solution

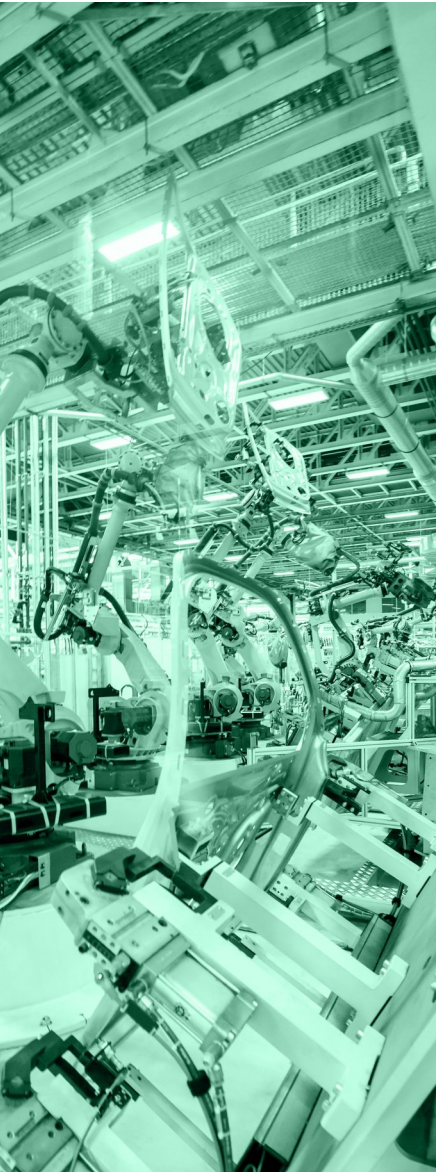

DSS WorkflowHero, developed jointly by Bosch Rexroth and DSS Consulting, facilitates workflow planning. This way,

- Experts can easily create and modify processes in a graphical interface with minimal manual work
- The assignment of tasks, information flow and reporting is streamlined for middle managers
- Senior managers can easily see the status of tasks and any major delays or problems thanks to reports

## Key Features

- Simple design of complex processes in an easy-to-use graphical interface
  - Multiple processes can be managed in parallel
  - Easy assignment of responsibilities, deadlines, reminders and comments to tasks
  - Tasks that are part of a process are automatically assigned to the persons responsible
  - Process branching according to urgency, decisions or conditions
  - Process steps and forks can be modelled in a graphical interface (status map)
  - Decision authorities, roles, privileges, manager-subordinate relationships are easily defined
- Each process can be fully tracked
- Process KPIs can be displayed on a Dashboard to generate sophisticated reports and real-time analytics
- "Low-code" platform - does not require in-depth IT knowledge
- Can be integrated with existing ERP systems
- When integrated with DSS StaffManager, DSS WorkflowHero provides a complex solution for managing and monitoring tasks and the resources allocated to them

## About DSS

Ever since its foundation, DSS Consulting Zrt. has specialized in custom developments, business intelligence systems and analytical solutions. We are proud that our company has pioneered business analytics solutions, data quality assurance and data mining in Hungary. Based on this knowledge and experience, we have expanded our portfolio with industrial digitalization solutions, thanks to which we have been able to effectively help the digitalization efforts of our customers not only in finance, insurance, and telecommunications, but also in the industrial sector for several years. Thanks to our experience of more than 20 years, as independent consultants, we have been focusing on choosing the best solution to each challenge that our customers deal with.
